Definity™
Cervical Dilator

with SureAccess™ Balloon Technology

REDEFINE DILATION
Redefine Dilation

Definity cervical dilator with SureAccess balloon technology

Effortlessly access a wide variety of cavities with innovative balloon technology that offers a gentle insertion and dilation you can be confident in.

- **VISUAL INDICATORS**: Color coding allows the user to view progress & charging of the device.
- **DILATION LEVER**: Easily control when dilation begins.
- **ERGONOMIC DESIGN**: Comfortable to hold for left or right handed users.
- **INFLATION DEVICE**: Reduces hand fatigue by maintaining pressure for the physician.
- **ACORN SEAL**: Enables secure positioning.
- **SUREACCESS BALLOON TECHNOLOGY**: Designed to dilate even stenotic or challenging anatomies.
- **SEAMLESS**: Expandable balloon designed to eliminate multiple passes.
- **GENTLE**: No tenaculum needed for reduced cervical trauma.
- **CONSISTENT**: Enable dilation through challenging anatomies, including stenosis.
- **CONFIDENT**: Reduce risk of perforation and creation of false passage.

Definity cervical dilator with SureAccess balloon technology...
Experience the next major advancement in dilation in over 140 years!

3 sizes to meet your hysteroscopic needs, enabling dilation through challenging anatomies, including stenosis, tortuous canals or cervices associated with severely anteverted or retroverted uteri.¹

Below are a few possible opportunities in which the Definity cervical dilator can be used. Please note that this list is not exhaustive.

IMPORTANT SAFETY INFORMATION
The Definity™ cervical dilator catheter system is intended to be used whenever cervical softening and dilation is desired. Some examples are: treatment of cervical stenosis, IUD placement and removal, placement of instruments for intrauterine radiotherapy, endometrial biopsy, global endometrial ablation, uterine tissue removal, uterine curettage, diagnostic hysteroscopy, operative hysteroscopy. This device is not intended for use in the induction of labor. Use of the Definity cervical dilator catheter system is contraindicated in patients with: an active genital tract infection such as genital herpes, pelvic structure abnormality that prevents passage of the device, or invasive cervical cancer. This device is also contraindicated for the induction of labor.
